Idris AlTamimi

Frontend Developer and UX Engineer

I'm a Frontend Developer, valued for creating engaging, high-performance, and accessible web experiences.

Experience

Throughout my coding journey, I have worked on several web projects, working independently or collaborating with a team.

Web Developer — Freelance
Aug 2022 - Present

A versatile full-stack developer offering comprehensive web development services, ranging from creating new websites to testing and resolving issues in existing ones. In my most recent work:

- Despite not having prior experience with Angular, I utilized my solid JavaScript experience to make the necessary changes.
- Successfully identified and resolved over 20 bugs, errors, and UX related issues within the web application.
- I improved website performance and loading speed.

Frontend Developer — Brainnest
Sept - Oct 2022

Designing and developing user-facing interfaces for web applications. Some of my responsibilities were:

- Translating design mockups and wireframes into clean and efficient HTML, CSS, and JavaScript code.
- Enhance the User Experience (UX) by optimizing website speed, creating seamless navigation, error handling and giving feedback, and conducting user testing sessions to gather feedback and insights.
- Participating in code reviews and maintaining code quality and consistency across projects.
